Gmail Clone: [🔗](#)

This repository contains code for a Gmail website clone created using HTML and Tailwind CSS. The clone is designed to replicate the Gmail web interface. This is designed to be fully responsive, offering a seamless experience across different screen sizes.

- A faithful reproduction of the Gmail user interface.
- Responsive design for various screen sizes.
- Customizable and extendable codebase built with HTML and Tailwind CSS.
- code <https://github.com/kunalkumawat07/gmail.git> [🔗](#)

YouTube Web Clone [🔗](#)

This is a responsive front-end clone of YouTube built using modern web technologies. It replicates the core layout and UI elements of the original YouTube interface, including the navigation bar, sidebar, video thumbnails, and content grid. The project showcases strong skills in HTML, Tailwind CSS
